**SAFETY
FIRST**

**SECURE
SUPPORT**

**INSPECT
REGULARLY**

**WORK
SAFE**

**NUAXLE IS
A VEHICLE
SUPPORT DEVICE
NOT A LIFTING DEVICE**

KEY SAFETY RULES

- ✓ Use only on firm, level surfaces.
- ✓ Inspect before every use.
- ✓ Ensure wheel nuts/bolts are clean and undamaged.
- ✓ Tighten to the vehicle manufacturers torque specification.
- ✓ Check stability before commencing work.

- ✗ Never exceed the maximum load capacity.
- ✗ Do not use on damaged wheel studs.
- ✗ Do not use if the product is damaged.
- ✗ Do not modify the product.
- ✗ Never work under a vehicle supported by only a jack.

INSPECTION CHECKLIST (BEFORE EACH USE)

- ☐ Check welds, mounting holes and structure are free from damage.
- ☐ Check rubber base strip is secure.
- ☐ Check for cracks, deformation or corrosion.
- ☐ Ensure all fittings are in good condition.

EMERGENCY ACTION

If the vehicle becomes unstable:

1. Stop work immediately.
2. Clear all personal from the area.
3. Support the vehicle using an approved lifting device.
4. Investigate the cause before reuse.

RISK ASSESSMENT CONSIDERATIONS

- Ensure the work area is safe and clear of hazards.
- Consider the weight and balance of the vehicle and ensure you are using the correct number of stands.
- Use appropriate PPE.
